

The eDHP-18 TrialMax

An Author pre-approved eDHP-18

The eDHP-18 TrialMax edition is author pre-approved and ready to deploy following rapid validation through Oxford Innovation's accelerated equivalency program.*

The eDHP-18 TrialMax edition takes advantage of the TrialMax eCOA platform's usability and patient retention enhancements for improved efficiency in collecting clinical outcome data directly from patients and sites during diabetes trials.

The eDHP-18 TrialMax edition offers:

Reduced patient and site burden through a user interface design with extensive usability testing, allowing integration in eCOA programs with multiple questionnaires, while maintaining consistent interface and navigation

Increased patient engagement with the ability to send SMS and email reminders to patients across all TrialMax eCOA solutions

Automated scoring build onto the reporting portal to support tailored therapeutic and patient support programs
